

LSST Communications Office

Ranpal Gill
Communications Manager – LSST/AURA

LineA meeting
26th September 2018

Large Synoptic Survey Telescope

A ground based 8.4m optical telescope
Located in Chile on Cerro Pachón
Site construction began April 2015
10 year survey starting 2022
Construction budget of US\$671,000,000

Private, Corporate, and Institutional Donors

US\$ 30 M

(e.g. Bill Gates & Simonyi foundation)

US\$ 473 M

US\$ 168 M

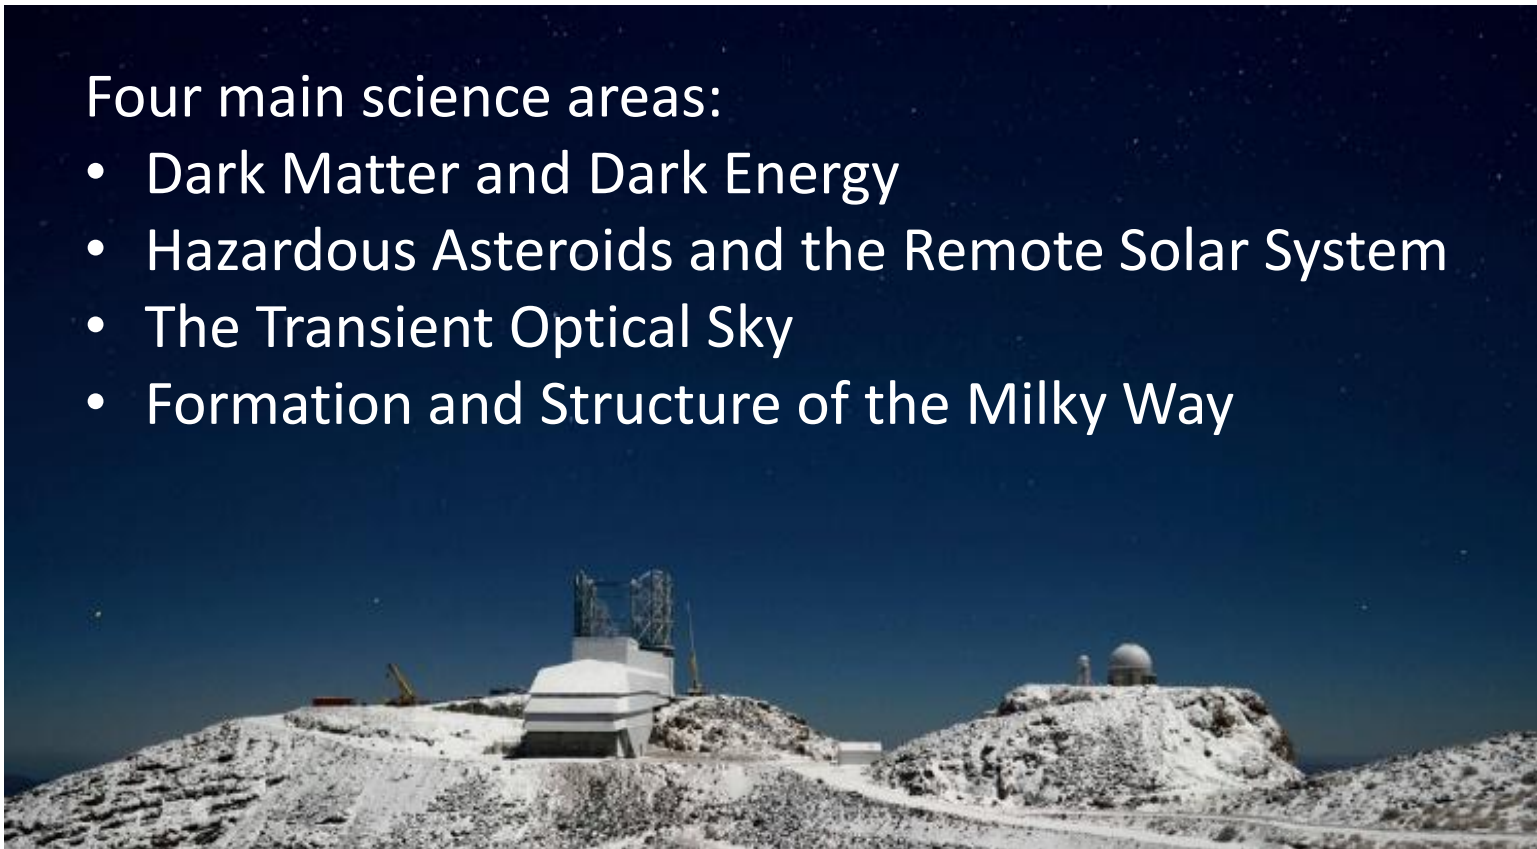

Science goals

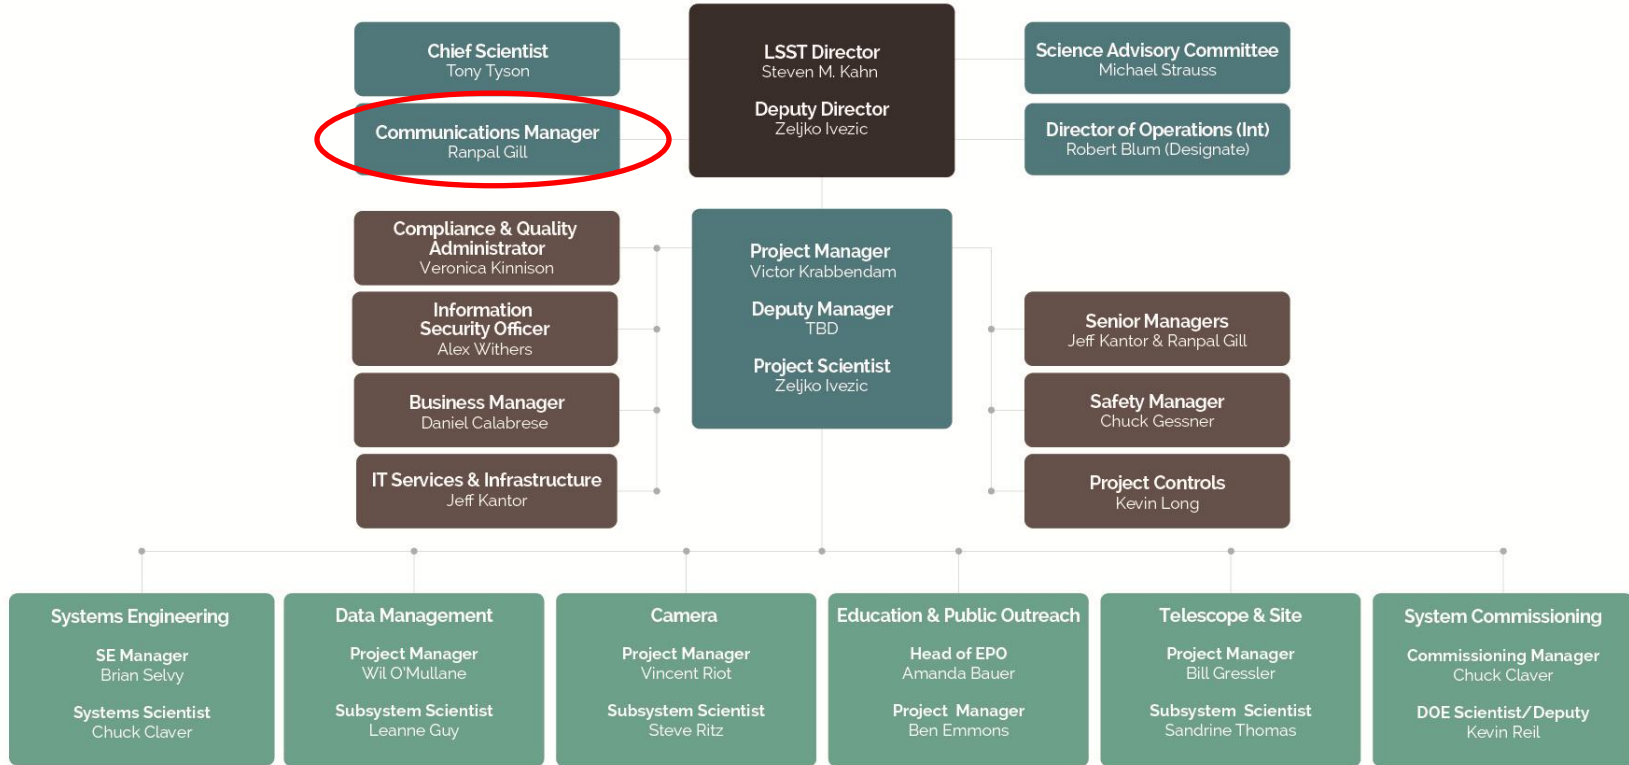

Four main science areas:

- Dark Matter and Dark Energy
- Hazardous Asteroids and the Remote Solar System
- The Transient Optical Sky
- Formation and Structure of the Milky Way

LSST Organization

EPO is not communications

0/20/2010

Mission: facilitate communications between LSST and its **stakeholders** keeping them **informed** on construction progress, science opportunities, and other essential Project information.

The communications office is responsible for:

- Writing and distributing **news** updates, announcements
- Addressing **inquiries**
- Generating/updating **website** text & graphics
- **LSST Branding**
- Providing support for **meetings**, conferences, town halls
- Maintaining @LSST presence on **social media**
- Community **surveys**

Mission: offer accessible and engaging online experiences that provide **non-specialists** access to, and context for, LSST data so anyone can explore the Universe and be part of the **discovery process**.

During Construction, EPO will build:

- Formal education program based on online notebooks
- Operations website in English and Spanish
- Repository of multimedia resources
- Cloud-based EPO Data Center
- Capability to build citizen science projects
- Strategy for how EPO will measure success
- Communications Plan for Operations

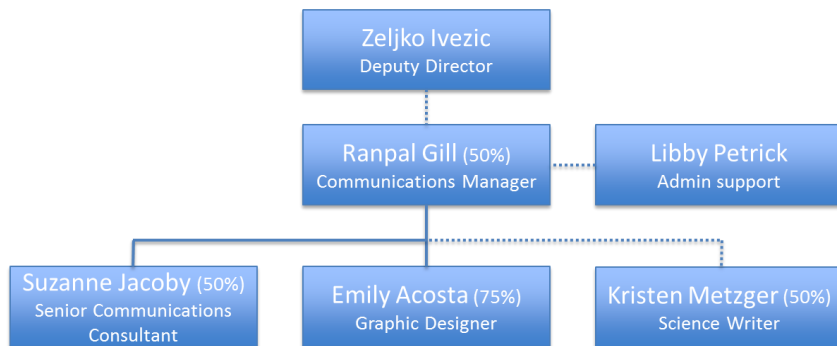

During Operations, Communications and EPO are a single department.

The Communications Team

FTEs: only 2.25!!

Combined professional experience: >~100 years!!

Communications Office

Mission: Facilitate **communications** between LSST and its **stakeholders** keeping them informed on construction **progress**, **science** opportunities, and other essential Project **information**.

LSST Astronomy @LSST · Sep 19
We're delighted to announce that Professor Zeljko Ivezic of the University of Washington is the new Deputy Director of the LSST Construction Project! @LSST @UW @ivezic #NSFScience ow.ly/1fz7301ToG1

ZELJKO IVEZIC APPOINTED DEPUTY DIRECTOR

Dear Colleagues,

I am delighted to announce that Professor Zeljko Ivezic of the University of Washington has agreed to take on the role of Deputy Director of the LSST Construction Project, effective September 1, 2018.

Zeljko has been associated with the LSST Project since its inception in the early 2000s. As Project Scientist, he has taken primary responsibility for ensuring that the design and construction of the LSST system will be optimized for its scientific mission. In this capacity, he has chaired the Project Science Team, and played a major role in both internal and external reviews of the project. Zeljko brings a wealth of expertise and experience in survey astronomy in a variety of fields ranging from solar system science to studies of the structure of the Milky Way and cosmology.

Zeljko will retain his position as Project Scientist, but in his additional new capacity as Deputy Director, he will assist Victor Krabbenand and me in the overall management and direction of the program. He will be involved in all aspects of the project, but will take special responsibility for data management and interactions with the external scientific community.

I look forward to increasing my own interactions with Zeljko, and I hope you will welcome him into this new position.

Last but not least, I would like to take this opportunity to thank our former Deputy Director, Seth Willmott, for all that he contributed to LSST for the last three years.

Sincerely,
Alan H. Wright
LSST Director

August 13-17, 2018 - Tucson, Arizona

These are exciting times across the LSST Project as we continue to integrate hardware and software across subsystems, and LSST Commissioning begins. LSST 2018 thus marks a critical time for face-to-face interactions as the entire LSST Community prepares for Science.

Deadline to register is July 9th.

Program for Undergraduate Researchers

For the first time at the Project & Community Workshop, we will be hosting undergraduates working on LSST-related summer research projects, on Monday and Tuesday, August 13 - 14. Students will describe their work in a special poster session, participate in special tutorials and activities, attend the LSST2018 plenary sessions, and interact with scientists, engineers and educators for career advising.

For questions regarding the Summer Intern Program, contact: Ed Bierhot, Gordon Dickinson and

Participate in LSST

Now that LSST has received its federal construction start, the Project Office is focused on building the facility and the role of engaging the community to Enable Science from LSST during operations has been taken on by the LSST Corporation. There are many ways for you to participate in LSST now:

- LSST Communications Code of Conduct (PDF)
- Be informed by subscribing to our Project Digest.
- Or join the Scientists Making List.
- The community list.org forum is available for technical discussion and community-based software support.
- Read the community white paper on the LSST Observing Strategy in arxiv and contribute to the living document in GitHub.
- Become an Institutional Member of LSSTC.
- Join a Science Collaboration.
- Interact with the LSST Science Advisory Committee.
- Visit the LSST Data Management Website for information on downloading the Open Source Software stack and accessing data sets, begin by reading the User's Guide.
- Visit the LSST Simulation Website for information on the LSST Image and Operations Simulations efforts.
- Join the Teams - LSST is Hiring.
- There are also opportunities for Doing Business with LSST.

Campaigns 2018 Q4

- Photometric LSST Astronomical Time-series Classification Challenge (PLAsTiCC)
- Coating chamber shipping to Chile – ETA October 19th
- Division for Planetary Sciences 2018 conference
- Supercomputing 2018 – IN2P3 & NCSA
- Astronomical Data Analysis Software & Systems (ADASS) conference
- M1/M3 cell and mirror transportation to mirror lab for testing
- M2 shipping to Chile
- Telescope Mount Assembly disassembly and shipping
- Camera raft installation - SLAC
- American Astronomical Society (AAS) Conference

Communications Office Mission

Facilitate **communications** between LSST and its **stakeholders** keeping them informed on construction **progress**, **science** opportunities, and other essential Project **information**.

WHAT

The LSST Communications Office will achieve its mission by delivering **appropriately timed messages** through selected communications **channels** to target specific **audiences**.

HOW

Interactions

LSST

Large Synoptic Survey Telescope
